

Induct Software AS

Induct Software is the first truly integrated Web-based service that supports custom design, management, and measurement of the entire open innovation process. Induct integrates Enterprise 2.0 technology and social networking concepts with a flexible and customizable innovation process management framework.

Looking for talented .NET Developers

As a .NET Developer, you will be working on development projects and will be responsible for designing, developing, testing and deploying database-driven web-based applications using .Net technologies. You will participate in the full software development lifecycle from prototyping and design to release using agile software development methodologies.

Candidates we are looking for have:

- knowledge about Software as a Service and multitenant systems
- some experience, and takes an interest in, the Microsoft development platform
- a few years of relevant experience, but newly qualified are also of interest
- commitment to creating quality software

Tools and technology we are using:

- ASP.NET, C#, nHibernate and ActiveRecord
- Web Services
- XHTML, CSS, JavaScript, AJAX, and JQuery
- MySQL and Microsoft SQL Server
- Microsoft Enterprise Search

Induct Software can offer:

- an innovative workplace, focusing on constant improvements and new ideas
- regular working hours
- an enjoyable and informal working atmosphere
- interesting and motivating assignments
- a growing company seeking global success, currently doing business in Scandinavia, UK, USA, South America, India and China
- competitive compensation
- working location in Oslo

If this opportunity fits your background please send your resume to jcb@inductsoftware.com. The recruiting processes are done in a professional manner with due respect for the confidentiality of candidates.
